Pre-Ceremony Highlights

Video highlights of the bridal party ‘getting ready’ for the ceremony are recorded at the church one hour before the ceremony begins. Background music of your choice is added to the video track “at a lower volume”. The DVDs are also programmed with “audio options” and the music track can be turned off completely.

The Ceremony

The ceremony is recorded with 2 cameras covering several different angles throughout the ceremony, especially getting close-ups of the bride and groom during the exchange of wedding vows. A wireless microphone worn by the groom on his tuxedo in conjunction with one camera’s audio input will ensure the wedding vows can be heard on the video. **NOTE:** Some church/officiant restrictions will dictate the number/placement of cameras allowed to be used, and/or the videographer’s position/movement during the ceremony. It is your responsibility to check with your wedding officiant about any restrictions ahead of time.

Afternoon Highlights

Your video will highlight the afternoon’s activities; photos at the church and any other locations. Background music of your choice is added to the video track “at a lower volume”.
